

# PETITION Approve all Council applications to be designated GM-free crop areas To Hon David Basham MP, Minister for Primary Industries & Regional Development

We, the undersigned residents and voters of South Australia, call on the Minister for Primary Industries and Regional Development, Hon David Basham MP to:

- **enable farmers and the food industry** to take advantage of GM-free policies that maximise the market & trade benefits to their businesses and regions;
- **respect the democratic process** that delegated councils to consult with their communities, gather market and trade data, and to apply to you in good faith to restore their valuable GM-free food crop area status;
- **approve all applications from councils**, that their council area be designated as a region in which no genetically modified food crops may be cultivated, by publishing a notice in the Gazette.
