- There are three categories of packaging of potential concern relating to CMPF:
  - [REDACTED]
  - [REDACTED]
  - novel/new/emerging packaging materials (including active and intelligent packaging, nanomaterials and modified atmosphere packaging).
- Little is known about the potential adverse effects on public health of chemical migration from novel/new/emerging packaging materials into food. Significant resources may be required to achieve a satisfactory analysis of the inherent risk from this category of packaging so (at this

[REDACTED]

stage) it is excluded from the scope of the proposal.

[REDACTED]

Media interest in BPA and use of nanotechnology in packaging may result too.
